Profile

I'm a student in the career Software Engineer of the University of Colima. My main skills are focused on web development but also like to program in C ++. I have some experience working in web development with real clients. Since 2017 I have been in a dependency of the university making projects with them, some with external clients of the university and many internal, in that dependency, I worked with databases, front-end and back-end. Another particular thing about me is that I like to solve problems because I learn from them.

Skills

HTML5 & CSS3	●●●●○	JavaScript	●●●●○
PHP	●●●○○	Mysql	●●○○○
SQL	●●●○○	Ability to Work in a Team	●●●○○
C++	●○○○○	jQuery	●●●○○
